

CORSETS

Thomson's "Glove Fitting" is a name that means something. It means something because every section and every gore of every Corset they have made for more than half a century has been carefully put together to fit the figure like a glove.

When these first American made Corsets were introduced to the public in the late fifties, they were given the name of "Glove Fitting" because of the original glove-making ideas embodied in their designing. This name fitted the Corset because the Corset fitted the figure, and both achieved immediate success because the object of perfect style and perfect comfort to the wearer were accomplished.

There is a "Glove-Fitting" model for every figure and every purpose—ask to be fitted and you will be satisfied.

HIS STUBBLE CAME BACK, HIS CHARM WENT.

We once knew a red-headed fellow with a stiff beard that only shaved once a month. He had a sorry razor. On the first he would lather up and scrape off a vermillion stubble. For two or three days he was a pretty good looking fellow but for the balance of the month he was off the market.

His stubble came back, his charm went.
